

## ABSTRACT

An ultraviolet excited light-emitting device is disclosed. The ultraviolet excited light-emitting 5 device comprises a phosphor having at least one selected from the group consisting of Eu and Mn as an activator and a compound represented by a formula (1):

wherein  $M^1$  is at least two selected from the group 10 consisting of Ca, Sr and Ba, or Sr or Ba,  $M^2$  is at least one selected from the group consisting of Mg and Zn, and  $M^3$  is at least one selected from the group consisting of Si and Ge in the formula (1).
